## MIXING PAINTS

Imagine a chocolate bar that has 8 pieces. What does it mean to share it between 2 people in the ratio  $1 : 3$ ?  
How many pieces in each share?  
What about sharing in the ratio  $1 : 7$ ?  
If you shared two bars, one bar in the ratio  $1 : 3$  and the other in the ratio  $1 : 7$  how many pieces would each person get?
