

HAPPY BIRTHDAY

Class 4 have made a bar chart showing the months of their birthdays.

Which is the month with no birthdays?

Which months have four birthdays?

How many children are in the class?

Make a birthday bar chart for your class. Everyone should write their name or initials in one of the boxes in the column for their birth month in this chart.

Our Birthday Months

January	February	March	April	May	June	July	August	September	October	November	December

Help

The teacher and other learners can help everyone in the class to find a box in which to write their name.

Extension

You could collect some other data and draw a bar chart of your data. Perhaps ask the other learners in your class what is their favourite food or favourite colour.
