

ONE THREE FIVE SEVEN GAME

<https://aiminghigh.aimssec.ac.za/one-three-five-seven-game/>

GAME FOR 2 PLAYERS

Set out 16 objects in 4 rows as shown in the diagram.

Players take turns to choose a row and remove any number of objects from it.

The player left with the last object loses.

Notice especially the last few moves.

There is a point where one player gets the upper hand and the other player cannot win whatever he or she does.

Notice what leads up to that situation.
