TARGET 100

Spin a 0 to 9 spinner. Each player must write the digit in one of the top 4 squares. Once written the number cannot be changed. Spin 3 more times. The winner is the one whose total is closest to 100.

VERSIONS OF
THESE GAMES

Make a spinner. Play the game based on multiplying 3 digit numbers by 2 digit numbers. How close can you get to an answer of 10,000?

TARGET 4 BY 2 DIVISION

Be nearest to 100 to win.
Place each random digit drawn in one of the boxes. Thinking about probabilities and understanding the division algorithm will help you to win.

HALF A MILLION GAME

Six digits from 0 to 9 are chosen randomly. As they are chosen players write them in 6 boxes. The winner is the player whose number is closest to half a million.
