

POLYSTARS PUZZLE AND GAME

<https://aiminghigh.aimssec.ac.za/polystars-game/>

PUZZLE You need 4 copies of each game piece. Make 16 polygon-star pairs so that no two are the same. Place the pairs on a 4 by 4 grid so that no two rows, columns or diagonals have two polygons of the same colour or two stars of the same colour - the winning layout.

GAME Place the pairs on the board randomly. Take turns to exchange two pairs. The winner is the one to make the winning layout.
