

PLAY THE GAME OF 'IN A BOX'

<https://aiminghigh.aimssec.ac.za/in-a-box/>

Najwa and Zuki play a game.

They put two red and four blue ribbons in a box. They pull out two ribbons at the same time without looking at the colours.

Najwa wins if both ribbons are the same colour.

Zuki wins if the two ribbons are different colours.

Is this a fair game?

If there were two of each colour would it be a fair game?
