

SIEGE GAME

<https://aiminghigh.aimssec.ac.za/the-siege-game/>

The roadmap shows 9 roads in red and 8 towns in yellow. The roads connect 2, 3 or 4 towns and all towns lie on exactly 3 roads.

Players take turns to put a counter on one of the roads to take control of it and close the full length of the road even though it may pass through several towns. The winner is the first player to claim 3 roads going through the same town so putting it under siege.
